

Disposable Endoscopic Cutting Stapler

Rotating cartridge, more flexible in narrow surgery space. 3 terraced staple heights combined into one cartridge.

Ambidextrous design of Handle

Features and Benefits:

Variable reload sizes, allowing options for the surgeon regarding tissue thickness decreasing the risk of leakage, and increasing the quality of the anastomosis.

Each reload has a blade allowing a sharp and efficient cutting action with every firing of a reload.

Each reload has six rows of staples, decreasing the risk of leakage, and increasing the quality of the anastomosis.
